

3-D Logic Motion Sensing of Polyvinylidene Fluoride based Flexible Interactive Electronics

Pengcheng Wu, Guanglin Li, and Yanlong Tai

Shenzhen Institutes of Advanced Technology, CAS, Shenzhen, 518055, China

Zhenguo Yang

Department of Materials Science, Fudan University, Shanghai 200433, China

- Fabricate a new 3D tactile sensing technology based on rGOPF flexible film
- Achieve a logic potential responds to various tactile motions accurately
- Applications to human-machine interactions, human finger electronics
