

Low-cost and Robust Mapping and Relocalization Method Base on LidarInertial Odometry

Pengfei Qu, Shenliang Li, Jinyang Zhang
Zhansheng Duan and Kuizhi Mei

Department of Electronic and Information Engineering,
Xi'an Jiaotong University, China

- The design of low-cost and robust mobile robot platform
- Ego-motion estimation with IMU and solid state Lidar
- 3D point clouds features extraction and selection
- The mapping of 3D point clouds and the method of relocalization.
