Multi-Agent Trajectory Prediction Based on Graph Neural Network

Haozhe Du, Zhike Chen, Yufeng Wang, Zheyuan Huang, Yunkai Wang and Rong Xiong

Institute of Cyber-Systems and Control, Zhejiang University, China

- Construct ZJUNlictSSL dataset for multi-agent prediction problems.

- Propose a heterogeneous graph neural method for multi-agent prediction problems.

- Our method focuses on enviroment and tasks of agents in problems.

- Present a new view for graph-like scenes in multi-agent prediction problems.
